

Non-Primitive Data Type or Reference Data Types	1
Single-Dimensional Arrays.....	2
Strings	5
Objects Oriented Programming	8
Class and Object	10
Example Blueprint.....	11
Instantiating: Making Objects from Your Class	11
What Happens in Computer Memory During Instantiation?.....	11
Inheritance	12
Abstract Class	14
Polymorphism.....	16
Polymorphism in Action (Code Example).....	16
Variable scope.....	18
Project - Build a Student Grade & Honor Roll Tracker.....	20
Task 1: Read messy Student Names from user.....	20
Task 2: Request user to input Math and Science grade and calculate the average	22
Task 3: Scale Up to a Full Schedule.	23
Task 4: Clean the Main Architecture (Introducing Multiple Functions)	24
Task 5: OOPs concepts – class, encapsulation	26
Task 6: OOPs concepts – Data hiding	28
Task 7: OOPs – Inheritance and overriding.....	31
Task 8: OOPS – Polymorphism.....	34
Task 9: File Input Output.....	37
Task 10: Read back from on start-up.....	40
